

STORAGE.TRANSPORT.LOGISTICS' 2010

Ladies and Gentleman!

We invite you to participate in

Storage.Transport.Logistics' 2010

The 17th International Specialized Exhibition.

This will be the 17th edition of the key annual forum for the Russian economy – Sklad. Transport. Logistika (STL). The high international reputation of the exhibition is confirmed by the labels of UFI – the Global Association of the Exhibition Industry, and RUEF – the Russian Union of Exhibitions and Fairs.

According to the exhibition audit data there were 250 exhibitors, 34 foreign exhibitors from 24 world countries included.

We expect even more this year. One of the most important industry brunches – special purpose packaging and equipment - will be presented as a separate TransPack Salon. According to many estimation the need for modern warehousing complexes, warehousing equipment and machinery, full circle transportation services, new management and monitoring solutions is still extremely high in Russia, despite the economic difficulties.
